SUMMARY

AI Data Engineer with 3+ years at Siemens building ETL/ELT pipelines in Python, managing Snowflake data warehouse operations, and deploying Gen AI solutions on Azure. Delivered a supply-chain chatbot using Neo4j, Azure OpenAI, and LangChain, and a Streamlit application managing 10,000+ supplier mappings.

WORK EXPERIENCE

Data Engineer (Working Student), Siemens AG – Munich

07/2024 – Present

- Build Python ETL pipelines with GitLab CI/CD, using a Sentence Transformers (SBERT) model to automatically match supplier names from multiple source systems, reducing manual mapping by 50%
- Develop and deploy a Streamlit application on Azure for reviewing and managing over 10,000 supplier name and location mappings, reducing manual correction effort by roughly 30–40%
- Manage Snowflake data warehouse operations, optimizing ELT workflows using SQL to improve pipeline efficiency for enterprise-scale supply-chain analytics
- Integrate external REST APIs to automatically enrich supplier and location records across 10,000+ entries, replacing manual lookup workflows with fully automated real-time data enrichment
- Develop and maintain Neo4j Cypher query templates for supply-chain data retrieval, enabling structured graph queries across supplier networks, risk tracking, and component tracing
- Build and deploy a natural-language supply-chain chatbot in Python using a two-tier rule-based and Azure OpenAI fallback engine, deployed as an Azure ML Managed Online Endpoint

Data Analyst (Working Student), Siemens Mobility – Erlangen

06/2022 – 06/2024

- Designed interactive Power BI dashboards for real-time KPI tracking, used across 3 operational teams
- Developed ETL workflows with Power Query to consolidate data from 6 diverse sources including Snowflake and Excel, ensuring consistent data quality
- Developed advanced DAX analytical models, reducing manual reporting time by 40–45%
- Automated KPI reporting processes, eliminating roughly 10–15 hours of manual work per week
- Built a supplier risk assessment application in Mendix covering 8 risk dimensions per supplier, with automated risk classification, a Risk Share dashboard, and an Excel importer for bulk data upload, deployed to Mendix Cloud

EDUCATION

Master of Science in Data Science

10/2021 – 05/2025

Friedrich-Alexander University Erlangen-Nürnberg

Bachelor of Science in Computer Science

10/2015 – 06/2020

University of South Asia

TECHNICAL & ANALYTICAL SKILLS

Programming/DB: Python (Pandas, NumPy, PyTorch), SQL, Snowflake, dbt, Neo4j, NoSQL, R, JSON

Cloud/DevOps: AWS, Azure, GitLab CI/CD, Docker, Kubernetes, REST APIs

Analytics & BI: Power BI (DAX, Power Query), Streamlit, NeoDash, Statistical Analysis, Graph Analytics

Methods: Data Engineering, ETL/ELT, Graph Data Modeling, ML (Transformers), Generative AI, LangChain, Azure OpenAI, Claude API (Anthropic), LLM, Data Modeling, Performance Tuning, Prompt Engineering, Natural Language Processing (NLP)

Soft Skills: Structured Problem Solving | Cross-functional Collaboration | Self-directed Working Style

CERTIFICATIONS

- Neo4j Certified Professional – **Neo4j**
- Microsoft AI Agents: From Foundations to Applications Professional Certificate – **Microsoft**
- Microsoft Generative AI for Data Analysis Professional Certificate – **Microsoft**
- AWS Certified Cloud Practitioner – **AWS**
- Python for Data Science, AI & Development – **IBM**
- Databases and SQL for Data Science with Python – **IBM**
